

About us

Our Journey

How It began

I've always had a deep love for music both the classics and the new. Growing up with a father in a band, I have vivid memories of him taking me to concerts across Ireland, and it was there that I truly fell in love with music in all its forms. As I got older, I knew I wanted to share that same passion with others. That's how Headline was born a place where people can discover new jams and classic hits, all in one spot, just as I experienced it.

Headline was my way of giving back to the world what music gave to me. It's a platform where everyone can explore the sounds that have shaped my life whether it's uncovering fresh tracks or revisiting timeless classics.

"Headline was built by music lovers, for music lovers our goal is to create a space where you can discover new jams, revisit classic hits, and always find the perfect sound to vibe with"

Our Goal

Behind the music

Creating Headline has been a journey fueled by that same passion for music that I felt as a kid. I wanted to build a community where music lovers could come together, discover new favorites, and dive deep into the rich history of music that's shaped us all. It's not just about the songs it's about the stories, the emotions, and the connections that music brings.

At Headline, we're all about making music more than just something you listen to it's something you experience. We're building a space where you can share your love for music, discover new artists, and connect with others who feel the same way.
